Statement	I.—*Total and average consumption of hemp drugs*	37
Statement	II.—Hemp drugs revenue, its percentage to total Excise revenue and its incidence per head of population	38
Statement	III.—Number of shops for the retail sale of hemp drugs	39
Statement	IV.—Rates of duty per seer levied on each description of hemp drugs and the average taxation per seer on all descriptions of hemp drugs taken together	40—41
Statement	V.—Number of convictions for offences relating to hemp drugs	42
Statement	VI.—Percentage of total gross revenue derived from hemp drugs	43
Statement	VII.—Quantities of hemp drugs seized	44

CHAPTER I.

MADRAS PRESIDENCY.

1. *General revenue statistics.*—The hemp drugs receipts for the year 1932-33 amounted to Rs. 20,42,144 and formed 4·8 per cent. of the total excise revenue of the Presidency. Rs. 11·35 lakhs were realised by duty and Rs. 9·07 lakhs by vend fees. '*Charas*' was not consumed in this Presidency. The receipts were derived entirely from *ganja* and *bhang*. The right of vend of these drugs was sold together. From the statistics of duty realised on issues within the Presidency for the year given in Imperial Form I of the Excise Administration Report, it will be seen that *ganja* accounted for 96·4 per cent. of the duty. The hemp drugs receipts for the year 1931-32 amounted to Rs. 19,57,040 and formed 4·6 per cent. of the total excise revenue. In 1912-13 the revenue from these drugs was Rs. 7,24,000 and the percentage to total excise revenue was 2·2 (*vide* Statement II).

2. *Cultivation, storage and supply.*—Madras produced its own supply of hemp drugs. Import of the drugs into the Presidency was prohibited. Madras also supplied the demand of the Indian States and French Settlements within the Presidency limits. Coorg did not take its supply from this Presidency.

Cultivation of the hemp plant was prohibited throughout the Presidency except (*a*) in the Bapatla taluk of the Guntur district and (*b*) the Hosur taluk of the Salem district where it was permitted under licence. The area cultivated during 1932-33 was 179 acres and 19 cents against 215 acres in 1931-32 in the Guntur district. The area cultivated at Hosur centre during 1932-33 was 60 acres. The special staff sanctioned for the botanical investigation of *ganja* continued its work during the year. In 1912-13 the total area cultivated amounted to 209 acres.

The licensees were required to convey their produce to public storehouses established by Government at Vetapalem and Mathigiri and removal of these drugs from the storehouses for consumption was permitted only on payment of duty at the prescribed rates, *viz.*, Rs. 25 per seer of *ganja* and Rs. 10 per seer of *bhang*. In 1912-13 the rates of duty were Rs. 7-8-0 per seer of *ganja* and Rs. 3 per seer for *bhang*. The storehouses were in charge of Assistant Inspectors of the Excise Department (on Rs. 150-200 per mensem); a temporary establishment of 1 Assistant Inspector on Rs. 150-200 per mensem with extra Sub-Inspectors (on Rs. 60-90 per mensem each) was employed at each of the centres Vetapalem and Hosur to supervise the cultivation and harvesting operations.

3. *Vend arrangements.*—The storehouses supplied retail vendors throughout the Presidency. Small shops could also obtain their supplies from other shops in the same district. Licenses for retail sale were sold annually by auction. The total number of retail shops in 1932-33 was 453 against 452

in the preceding year and 538 in 1912-13. The figures relating to the average area per shop and the number of shops per 100,000 of population are given below :—

Year.	Average area per shop in square miles.	No. of shops per 100,000 of population.
1932-33	314·64	0·97
1931-32	315·34	0·97
1912-13	264·55	1·30

4. *Consumption and average taxation.*—The total consumption of *ganja*, *bhang* and their preparations in 1932-33 was 48,161 seers giving an average consumption of 1·03 seer per 1,000 of population according to the census figures of 1931 ; the average incidence of taxation amounted to Rs. 41·85 per seer of which Rs. 23·02 was derived from duty. In 1931-32 the total consumption of hemp drugs amounted to 44,267 seers against 52,478 seers in 1912-13. The average consumption of hemp drugs per 1,000 of population in 1931-32 was 0·95 seer compared with 1·3 seers in 1912-13. The average incidence of taxation per seer of hemp drugs in 1931-32 amounted to Rs. 43·78 against Rs. 13·8 per seer during the year 1912-13.

5. *Hemp drug offences.*—The total number of offences relating to hemp drugs increased from 445 to 529, chiefly contributed under unlicensed possession. There were indications that the abolition of the special staff of the Excise Intelligence Bureau due to acute financial stringency led to a recrudescence of smuggling of opium and *ganja* on a large scale. In one of the cases detected, the quantity involved was as much as 65 seers of opium and 16 seers of *ganja*. The drugs were intended for export to Ceylon.

CHAPTER II.

Bombay Presidency Proper.

6. *General revenue statistics.*—The hemp drugs receipts (excluding revenue from hemp drugs issued to Indian States) for the year ending 31st March 1932 were Rs. 17,19,966 being 5·45 per cent. of the total excise receipts of the Presidency proper. The corresponding figures of hemp drugs revenue for the years 1931-32 and 1912-13 were Rs. 16·94 lakhs and Rs. 6·0 lakhs respectively. The percentage which revenue during these two years bore to total excise revenue were 5·7 in 1931-32 and 3·9 in the year 1912-13. Of Rs. 17,19,966 realised in the Presidency proper Rs. 10·22 lakhs represent duty and Rs. 6·97 lakhs license fees.

7. *Cultivation, manufacture and storage.*—The cultivation of the hemp plant (mainly for *ganja*) was restricted to one taluka of the Ahmednagar district and was carried on under licenses which were issued free of charge. The licensed cultivators could either sell their standing crop to licensed manufacturers, or obtaining a manufacturing license, harvest their crops on their own account. In either case the harvesting of the crops had to be carried on with the permission of the Local Excise Officers and under their supervision. A fee of Re. 1 per annum was charged for the license to manufacture intoxicating drugs from the hemp cultivated. All drugs manufactured were stored in a bonded warehouse established near the place of manufacture. There was one such warehouse in the district of Ahmednagar. From that central warehouse the drugs were issued on payment of duty to local licensed dealers, or to authorised purchasers from Indian States and foreign possessions, or were transferred in bond to other bonded warehouses established for the storage of imported drugs, of which there was one in the city of Bombay and one in each of the districts of Ahmedabad and Surat. For the storage of the drugs in these warehouses a small fee was charged, and issues therefrom were made under strict official supervision.

In 1932-33 the cultivation of *ganja* was restricted to three villages in the Ahmednagar district, *viz.*, Mhekari, Kaudgaon and Pimpalgaon. In the preceding year cultivation was not allowed as there was sufficient stock of *ganja* to meet all requirements. During the year under report the area under hemp cultivation was 146 acres and 2,430 maunds of *ganja* were produced. In 1930-31, the year when cultivation was last permitted the area cultivated was 300 acres and 4,029 maunds of *ganja* were produced. In 1912-13 the area under hemp cultivation amounted to 644 acres for *ganja* and 12 acres for *bhang*, which produced 3,992 maunds of *ganja* and 2 maunds of *bhang*.

8. *Import and export.*—Licensed vendors could import in bond under permits and passes, *ganja* from any province in British India and *bhang* from the United Provinces or the Punjab for deposit in one of the bonded warehouses. The sale of *charas* in the Town and Island of Bombay and Ahmedabad City was re-introduced with effect from 1st April 1931. Issues from the bonded warehouses for local consumption or re-export to Indian States and foreign possessions were subject to payment of duty. Transfers from one warehouse to another were effected in bond. Import by private persons was prohibited; but *bonâ fide* travellers coming from foreign territory could possess for their own use *ganja* or any preparation or admixture thereof not exceeding one tola of *bhang* or any preparation or admixture thereof not exceeding 5 tolas. *Bonâ fide* travellers proceeding to the City of Ahmedabad or the Town and Island

of Bombay from foreign territory or other provinces in India could possess for their own use *charas* or any preparation or admixture thereof not exceeding one quarter of a tola. Export by sea to foreign countries beyond India was permitted from the warehouse at Bombay only. All exports were subject to payment of duty, except those in respect of which any remission or refund of duty could be allowed in accordance with special arrangements entered into with the importing State concerned. States which agreed to assimilate their system of hemp drugs administration to that in force in British territory, or to take other adequate measures for the protection of the British hemp drugs revenue were allowed a refund of 13/14ths of the duty leviable on drugs supplied to them from British warehouses, whilst a fixed annual compensation liable to subsequent adjustment on the basis of actual revenue realised was paid to those which had leased their hemp drugs revenue to the British Government.

Statistics of import and export of drugs in the Presidency proper are furnished in Imperial Return IV-A and in paragraph 28 of the Provincial Excise Administration Report for the year 1932-33. During the year 66 maunds of *ganja*, 22 maunds of *bhang* and 8 maunds of *charas* were exported to Indian States from the Presidency proper. This year 10 maunds of *ganja* were exported to foreign countries.

9. *Transport, private possession, duty and vend arrangements.*—The maximum quantities of hemp drugs which could be transported without a permit from one place to another within the Presidency, or sold by retail, were five tolas in the case of *ganja* or any preparation or admixture thereof, and one-fourth of a seer or twenty tolas in the case of *bhang* or any preparation or admixture thereof. In the case of *charas* the limit was fixed at 3 tolas in the Town and Island of Bombay and Ahmedabad City. The rates of duty leviable on the drugs during the years 1912-13, 1931-32 and 1932-33 were as follows :—

	Per Seer.		
	1912-13.	1931-32.	1932-33.
	Rs. A. P.	Rs. A. P.	Rs. A. P.
On *ganja*	6 0 0	35 0 0	30 0 0
On *bhang*	1 0 0	4 0 0	4 0 0
On *charas*	12 0 0	45 0 0	45 0 0

Wholesale vend of these drugs was carried on separately from retail vend. Licenses for wholesale vend were issued to persons approved by the Collector and the Commissioner on payment of a fixed annual fee of Rs. 30 each. The privilege of retail vend at each shop was sold separately by public auction. In the year under report, 20 wholesale and 533 retail licenses were issued. In the previous year 20 wholesale and 522 retail licenses were issued against 20 wholesale and 572 retail licenses in 1912-13.

10. *Hemp drugs offences.*—During the year the number of cases relating to hemp drugs increased from 452 to 461.

11. *Total consumption and average taxation.*—The total consumption of hemp drugs in 1932-33 amounted as detailed below to 848 maunds or 1·89 seers per 1,000 of population, according to the figures of the census of 1931. The average consumption of all kinds of hemp drugs taken together per 1,000 of population amounted to 1·79 seers in the previous year against 4·0 seers during the year 1912-13.

	1912-13.	1931-32.	1932-33.
	Maunds.	Maunds.	Maunds.
Ganja	1,264	476	552
Bhang	208	191	179
Charas	136	138	117
	1,608	805	848

The average taxation was Rs. 50·69 per seer comprising Rs. 30·13 on account of duty and 20·59 on account of license fees. The average taxation per seer of all sorts of hemp drugs taken together in 1931-32 was Rs. 52·59 against Rs. 11·6 in 1912-13. The consumption of *charas* was entirely prohibited in the Presidency proper except the Town and Island of Bombay and the City of Ahmedabad.

CHAPTER III

SIND.

12. *General revenue statistics.*—The hemp drugs receipts for the year ending 31st March 1933, amounted to Rs. 6,76,150 being 21·70 per cent. of the total excise receipts for the Province. Of this Rs. 3,09,325 represent the duty and Rs. 3,66,825 the vend fees. In 1931-32 the revenue from hemp drugs amounted to Rs. 5·95 lakhs against 5·08 lakhs in the year 1912-13.

13. *Cultivation, manufacture and storage.*—The cultivation of *bhang* was permitted under license in Deh Bubak of the Larkana district. Licenses were issued free of charge and licensed cultivators could either sell their crops to licensed manufacturers or could on obtaining a manufacturing license themselves, harvest and sell their crops on their own account. In either case the harvesting of crops and the manufacture of *bhang* therefrom were done with the permission of the local Excise Officer and under his supervision. A fee of rupee one per annum was charged for the license to manufacture. All manufactured *bhang* was required to be stored in the bonded warehouse at Bubak, close to the area licensed for cultivation. From this central warehouse the *bhang* was issued on payment of duty to local licensed dealers. For the storage of *bhang* in the warehouse, a small rent was charged and all issues therefrom were made under strict supervision. In 1932-33, 38 acres and 20 ghuntas were cultivated but the crop was not harvested during the year. The area sown in 1931-32 (38 acres) and harvested in year 1932-33 yielded 1,405 mds. 13 seers 40 tolas of *bhang*.

14. *Import and export.*—Licensed vendors obtained their supplies of *bhang* from the Bubak bonded warehouse in the Badu district or wholesale depots on payment of duty. There was no production of *charas* and *ganja* in Sind. Warehouses for the import and storage of these hemp drugs (*charas* and *ganja*) in bond were also established at Karachi, Hyderabad and Sukkur in August 1924. The licensees were permitted to import *ganja* in bond from Ahmednagar (Bombay Presidency) and *charas* from the Punjab ; permits for imports in bond were issued only by the Collector of the district in which the bonded warehouse was situated. The duty on the drugs was levied at the time of issue from the bonded warehouse. Import by private persons was prohibited but *bonâ fide* travellers coming from foreign territory could import for their own use *charas*, *ganja*, and *bhang* or any preparation or admixture thereof in quantities not exceeding 1/4, 1 and 5 tolas, respectively.

Export from Sind to Baluchistan was at first permitted on payment of an export fee of As. 8 per maund but the same was subsequently discontinued. Again export duty was levied on all hemp drugs exported from any part of the Bombay Presidency under G. R., R. D., No. 1598-C., dated the 14th December 1931, read with G. N., No. 7992/28 dated the 22nd March 1932 at the following rates :—

	Rs.	
Ganja	30	per seer.
Bhang	4	per seer.
Charas	45	per seer.

In partial modification of the orders contained in paragraph one of Government Resolution No. 1598-C., dated the 14th December 1931, Government were pleased to direct that the duty on *charas* exported from Sind to Las-Bella and Khairpur States should be levied at the same rate as that levied on *charas* imported or manufactured in Sind.

15. The maximum quantities of hemp drugs which could be transported without a permit from one place to another within Sind or sold by retail were 5 tolas in the case of *ganja* or any preparation or admixture thereof, three tolas in the case of *charas* or any preparation or admixture thereof and one fourth of a seer or twenty tolas in the case of *bhang* or any preparation or admixture thereof. The duty leviable on hemp drugs per seer in 1912-13, 1931-32 and 1932-33 was as follows :—

	1912-13.	1931-32.	1932-33.
	Rs. A. P	Rs. A. P.	Rs. A. P.
Ganja	7 8 0	20 0 0	20 0 0
Charas	60 0 0	20 0 0	25 0 0
Bhang	1 0 0	2 0 0	2 0 0

Licenses for the wholesale vend of the drugs were issued to persons approved by the Collector and the Commissioner on payment of an annual fee assessed on sales at the following scale of fees :—

Eight annas per maund of *bhang* sold.

Four annas per seer of *charas* sold.

Four annas per seer of *ganja* sold.

The privilege of retail vend at each shop was sold separately by public auction. 9 wholesale and 205 retail licenses were issued during the year as against 11 wholesale and 204 retail in the previous year 1931-32 and 378 in the year 1912-13.

16. *Total consumption and average taxation.*—The total consumption of hemp drugs in 1932-33 amounted to 60,037 seers (7,885 seers *charas*, 171 seers *ganja* and 51,981 seers *bhang* or 15·41 seers per thousand of the population according to the census of 1931). In 1931-32 the average consumption based on the census of 1931 per thousand of population amounted to 17·36 seers against 33 seers in 1912-13. For figures showing the total consumption of these drugs during the years 1912-13 and 1931-32, please see Statement I. The decrease in sales is attributed to general poverty and to smuggling in Sind. The average taxation was Rs. 11·26 per seer of which 5·15 represented the duty and Rs. 6·11 the vend fees. In the previous year the average taxation of hemp drugs of various sorts taken together amounted to Rs. 8·79 per seer of which Rs. 4·44 represented the duty and Rs. 4·35 the vend fees. In 1912-13 the corresponding figures were 4·4, 2·6 and 1·8, respectively.

17. *Changes during the year.*—The following changes were introduced during the year under report :—

(*a*) The Excise duty on *charas* was raised from Rs. 20 to Rs. 25 per seer with effect from 1st April 1932 (G. R., R. D., No. 7992/28, dated 29th January 1932).

(*b*) The limit of sale, possession, etc., of *charas* without a permit was raised from one to three tolas from 1st April 1932 [G. R., R. D., No. 8362/28 (confidential), dated 30th January 1932].

(*c*) *Charas* was allowed to be retailed at 27 existing hemp drugs shops in Sind in addition to those where it was already sold, with effect from 1st April 1932 (G. R., R. D., No. 8362/28, dated 30th January 1932).

(*d*) The warehouse rent of six pies per three Indian maunds or fraction thereof in the case of *bhang* and six pies per three seers or fraction thereof in the case of other hemp drugs was raised to one anna per three Indian maunds or fraction thereof in the case of *bhang* and one anna per three seers or fraction thereof in the case of other hemp drugs (Commissioner in Sind's No. 699-E./IV, dated the 1st August 1932).

(*e*) In partial modification of the orders contained in paragraph one of Government Resolution, No. 1598-C., dated the 14th December 1931, Government were pleased to direct that the duty on *charas* exported from Sind to Las-Bella and Khairpur States should be levied at the same rate as that levied on *charas* imported or manufactured in Sind (G. R., R. D., No. 1598-C., dated the 22nd March 1933).

18. *Offences.*—The number of cases relating to hemp drugs in 1932-33 was 263 against 244 in the preceding year. The slight increase in the detection of cases during the year under report, calls for no remarks. The total quantity of Kelat *bhang* seized during the year was 2 maunds 38 seers and that of *charas* 1 maund 38 seers and 46 tolas. The number of hemp plants seized in fourteen cases of *bhang* cultivation was 3,696 plants.

CHAPTER IV.

BENGAL.

19. *General revenue statistics.*—The revenue from hemp drugs for the year 1932-33 was Rs. 31,17,979 as shown below and amounted to 22·17 per cent. of the total excise receipts of the province :—

	Duty.	Vend fees.	Total.
	Rs.	Rs.	Rs.
Ganja	15,89,217	12,55,221	28,44,438
Charas	80,592	69,788	1,50,380
Bhang	10,541	1,12,620	1,23,161
Total .	16,80,350	14,37,629	31,17,979

In 1931-32 the total revenue derived from all sorts of hemp drugs amounted to Rs. 34,22,882 and represented 21·82 per cent. of the total excise revenue during that year. In 1912-13 the revenue from hemp drugs amounted to Rs. 30,70,077 and the percentage which it bore to the total excise revenue was 22·31. (See Statement II.)

Ganja.

20. *Production, supply and vend arrangements.*—*Ganja* was grown in Bengal in a compact tract of country about 31 square miles in area at Naugaon in the district of Rajshahi. This area supplied not only the local requirements of this Presidency, but also those of Assam, part of Bihar and Orissa, part of the United Provinces and also of certain Indian States and foreign territories. The privilege of wholesale supply of *ganja* to all retail dealers in Bengal and to all wholesale dealers in other provinces and Indian States, has been granted by Government to the Naugaon *Ganja* Cultivators' Co-operative Society. This Society which is composed entirely of *ganja* cultivators purchases the whole crop each year from the individual cultivators and sells to retail and wholesale dealers at prices fixed by the Government from year to year on a definite basis. Each individual cultivator was licensed by the Collector to cultivate, and both cultivation and storage were conducted under close excise supervision.

The details of cultivation for the last 3 years compared with those for the year 1912-13 are noted below :—

	No. of cultivators licensed.	Area licensed.	Total outturn.	Average outturn per bigha.
		Bighas.	Mds.	Mds. Srs.
1912-13	2,959	3,063	7,078	2 12
1930-31	2,949	1,800	3,431	1 38
1931-32	2,822	1,600	3,372	2 0
1932-33	2,649	1,201	2,984	2 13

Licenses for retail sale were settled under the "Bengal Fixed Fee System". Under this system, the retail price of the drug was fixed, and licensees paid monthly license or vend fees on the issues taken out in the preceding month on a graduated scale.

1,214 retail licenses were issued in 1932-33 against 1,211 and 1,422 retail licenses in 1931-32 and 1912-13 respectively.

21. *Duty, consumption and average taxation.*—The rate of duty in 1932-33 was Rs. 40 per seer of *ganja*, against Rs. 11 in 1912-13. The drug was consumed in all districts. The consumption of *ganja* in the British districts of Bengal in 1932-33 amounted to 942 maunds 29 seers against 1,013 maunds 16 seers in 1931-32 and 3,070 maunds in 1912-13. The average taxation on *ganja* was Rs. 73·2 per seer, of which Rs. 40 were derived from duty and Rs. 33·2 from vend fees. In 1931-32 the average taxation on *ganja* was Rs. 74·1 per seer (Rs. 40 from duty and the rest from vend fees) against Rs. 22·9 (Rs. 11 from duty) in 1912-13.

22. *Duty, arrangements in regard to ganja exported outside the British districts of the Province.—Ganja* despatched to the United Provinces, Bihar and Orissa, and Assam paid duty in those provinces. *Ganja* could also be exported to other provinces in British India either in bond or on pre-payment of duty in Bengal.

Supplies to Cooch-Behar and the Feudatory States of Orissa were allowed free of duty. *Ganja* exported elsewhere paid duty at the rate current in Bengal before issue.

Charas.

23. *Supply, duty and vend arrangements.*—The use of *charas* was practically confined to certain towns in western and central Bengal. It was procured from Central Asia through the medium of licensed contractors in the Punjab, and paid duty in Bengal at the rate of Rs. 70 per seer, half of which had to be deposited by the importer before he could get a permit for import, the balance being paid on arrival of the consignment. The rate of duty on *charas* during the year 1912-13 was Rs. 12 per seer.

The right of retail vend was disposed of under the "Bengal Fixed Fee System". The number of sanctioned shops was 34 in 1932-33 against 33 in 1931-32 and 51 in 1912-13.

24. *Consumption and average taxation.*—The consumption of *charas* in 1932-33 was 27 maunds 26 seers compared with 35 maunds 5 seers in the preceding year and 27 maunds in 1912-13. The average taxation per seer was Rs. 135·9 of which Rs. 70 were derived from duty and Rs. 65·9 from vend fees compared with Rs. 132·7 in 1931-32 and Rs. 53·8 in 1912-13. The duty on the article was raised to Rs. 70 per seer with effect from 1st April 1928.

Bhang.

25. *Supply, duty, vend arrangements, import and export.*—The cultivation of the *bhang* plant was forbidden, but it grows wild in many parts of Bengal. The collection of *bhang* for use as an intoxicant or for sale, was prohibited. The drug was obtained from the wholesale contractors in the district of Bhagalpore in Bihar and Orissa by the *Ganja* Cultivators' Co-operative Society, Naugaon, who were given the exclusive privilege of supply to retail vendors in the Presidency. Duty was levied on issues from warehouses to retail vendors at the rate of Re. 1 a seer, throughout the Presidency.

Bhang can only be exported to the States of Nepal, Bhutan and Sikkim, to the Tripura State and to French Chandernagore only on payment of duty in Bengal. In 1932-33, 3 maunds 12 seers of *bhang* were exported on payment of duty, against 3 maunds and 28 seers in the previous year.

The retail vendors of *bhang* were licensed under the Bengal Fixed Fee System as in the case of *ganja* and *charas*. Besides ordinary retail licenses, druggists' permits for the manufacture and sale of *bonâ fide* medicinal preparations containing *bhang* were granted to approved medical practitioners. In 1932-33, 1,036 licenses were granted for its retail vend, including 701 permits. Licenses issued for the retail sale of *bhang*, including druggists' permits during 1931-32 were 942 against 444 in 1912-13.

26. *Consumption and average taxation.*—The consumption of *bhang* in the year under review in the British districts of Bengal was 263 maunds 16 seers as compared with 301 maunds 24 seers in 1931-32 and 698·7 maunds in 1912-13. In 1932-33 the average taxation was Rs. 11·6 per seer (of which Re. 1 was derived from duty and Rs. 10·6 was derived from vend fees) whereas in 1931-32 it was Rs. 11·7 per seer, and in 1912-13 Rs. 3·7 per seer.

27. *Consumption and taxation statistics for ganja, charas and bhang together.*—Taking *ganja, charas* and *bhang* together the total consumption of hemp drugs in the British districts of Bengal in 1932-33 amounted to 1,233 mds. 31 seers or ·9 seer per 1,000 of the population according to the census figures of 1931. The general average taxation thereon was Rs. 63·1 per seer, of which Rs. 34·0 were derived from duty and 29·1 from vend fees. In 1931-32 the total consumption of hemp drugs of all descriptions amounted to 1,350 mds. 5 seers or 1 seer per 1,000 of the population. In 1912-13 it was 3,796 maunds or 3·34 seers per 1,000 of the population. The general average taxation in 1931-32 was Rs. 63·3 per seer (Rs. 33·6 from duty and the rest from vend fees). In 1912-13 it was Rs. 20·22 (Rs. 9·8 from duty and the balance from vend fees).

28. *Prosecutions and convictions.*—The arrests for "illicit cultivation or collection of *ganja* or *bhang*" decreased from 148 to 100. Prosecutions for "unlicensed sale of hemp drugs" decreased from 78 to 45. The arrests for "illicit possession of *ganja*" increased from 180 to 345 and those for "illicit possession of *charas*" increased from 24 to 42. The number of arrests for "illicit possession of *bhang*" increased from 159 to 256. The prosecutions for "unlawful import, export or transport of hemp drugs" increased from 1 to 7. The total number of persons convicted for offences relating to hemp drugs was 654 compared with 497 in the preceding year and 264 in 1912-13. There was thus an increase of 147·7 per cent. in the number of convictions in 1932-33 compared with that of the year 1912-13 and an increase of 31·5 per cent. over the figures of the preceding year (See Statement V).

CHAPTER V.

BURMA.

29. *General prohibition of the use of hemp drugs.*—The use of hemp drugs by ordinary persons, and their production, import and sale have been generally prohibited in Burma since 1873, the object being to keep Burmans from contracting the habit of consuming these drugs to which they had not previously been accustomed.

30. *Special licenses for possession for medicinal purposes.*—Possession of hemp drugs was prohibited except when possessed for medicinal purposes in the treatment of elephants or other beasts by (*a*) veterinary practitioners, or (*b*) other persons, under a licence granted by the Commissioner of the Arakan Division for that Division and by the Excise Commissioner for the rest of Burma. The number of licences issued for the possession of *ganja* for the treatment of elephants was 18, the same as in the previous year and one more than in 1912-13. The fees realised from these licences amounted to Rs. 90 in 1932-33, compared with Rs. 90 in 1931-32 and Rs. 85 in 1912-13.

Holders of such licences obtained their supplies from the stocks of illicit *ganja* confiscated by Government. This was sold to them at the rate of Rs. 5 per viss of 140 tolas.

Orders permitting pharmacists to keep and sell under licence galenical preparations of hemp were passed in 1930-31 by the Local Go vernment. Two licences were issued in Rangoon in 1932-33.

31. *Offences and convictions, seizures and smuggling of hemp drugs.*—Seizures of illicit hemp drugs decreased from 2,90,516 tolas in 1931-32 to 1,28,828 tolas in 1932-33 and convictions fell from 777 to 703. In 1912-13 seizures amounted to 1,52,945 tolas and convictions to 501.

CHAPTER VI.

Bihar and Orissa

32. *General revenue statistics.*—The revenue from hemp drugs (*ganja*, *bhang* and preparations thereof) for the year 1932-33 was Rs. 26,13,000 as shown below, and amounted to 21·3 per cent. of the total excise receipts of the province :—

	Duty.	Vend fees.	Total.
	Rs.	Rs.	Rs.
Ganja	11,98,000	13,36,000	25,34,000
Bhang	20,000	59,000	79,000
Total .	12,18,000	13,95,000	26,13,000

The total receipts from hemp drugs in 1912-13 and 1931-32 amounted to Rs. 23·06 lakhs and Rs. 24·68 lakhs, respectively, and the percentages which these revenues bore to the total excise revenue were 22·2 in 1912-13 and 20·1 in 1931-32.

33. *Ganja supply and vend arrangements.*—There were licensed warehouses for *ganja* in every district maintained under Government supervision at district and sub-divisional headquarters by licensed wholesale vendors (*goladars*), who got their licenses free of charge. The wholesale vendors procured *ganja* either from the Co-operative Society of *ganja* growers at Naugaon in the Rajshahi district of Bengal or from licensed cultivators from Bhagalpur, Darbhanga, Muzaffarpur and Cuttack and sold it to holders of retail licenses. Two licenses for the cultivation of *ganja* in the district of Bhagalpur and one each in the districts of Muzaffarpur, Cuttack and Darbhanga were granted in 1932-33 and the whole quantity manufactured was supplied to the wholesale vendors of this province. The sliding scale system was in force in all the districts of the province from April to June 1932. From 1st July 1932 the shops in the districts of Patna, Purnea and Ranchi were settled under the auction system and from 1st October 1932 this system was extended to the shops in all other districts of the province except Angul and Sambalpur. 54 wholesale and 1,131 retail licenses were issued in 1932-33. In 1912-13, 124 wholesale and 1,334 retail licenses were issued for the retail sale of *ganja*. The corresponding figures in 1931-32 were 54 and 1,109, respectively.

34. *Duty, consumption and average taxation.*—Duty was payable on the issue of the drug from the wholesale vendor's *golas* (warehouses). The rate per seer in force in 1932-33 was Rs. 40 in the districts of the Patna, Orissa and Chota Nagpur divisions, in the district of the Santhal Parganas and portions of the districts of Monghyr and Bhagalpur, lying south of the Ganges. In the rest of the province the duty remained at Rs. 35 a seer. With effect from 1st October 1932 the duty in the district of Saran was raised from Rs. 35 to Rs. 40 per seer. The rates per seer in force in 1912-13 were :—

	Rs.
Sambalpur	7
Other districts of Orissa	9
Elsewhere	11

The consumption of *ganja* in the British districts of Bihar and Orissa in 1932-33 amounted to 753 maunds and the taxation realized thereon was Rs. 11·68 lakhs from duty and Rs. 13·36 lakhs from vend fees. The average taxation per seer was thus Rs. 82·7, of which Rs. 38·6 were derived from duty and Rs. 44·1 from vend fees. Duty amounting to Rs. ·30 lakh on 19 maunds exported to other provinces and to the Political States within the province was also realized during the year under review. 55 maunds of *ganja* were exported out of the province in 1931-32 against 363 maunds in 1912-13, and the receipts therefrom were Rs. ·63 and Rs. 1·6 lakhs, respectively.

The consumption of *ganja* in the British districts of the province amounted to 31,036 seers in 1931-32 and 99,920 seers in 1912-13. The revenue derived from this drug amounted to Rs. 24·06 lakhs in 1931-32 and Rs. 20·93 lakhs in the year 1912-13. The average taxation per seer was Rs. 75·4 in 1931-32 and Rs. 20·9 in 1912-13.

35. *Duty arrangements in regard to ganja exported.*—*Ganja* was supplied free of duty to 22 of the Feudatory States in Orissa in consideration of these States having forbidden the cultivation of the hemp plant in their territories and adopted conditions of duty and vend arrangements similar to those existing in the British districts of Bihar and Orissa. *Ganja* could also be exported to other provinces in British India, either in bond or on prepayment of duty in force in Bihar and Orissa. The duty paid exports to Nepal, the Chota Nagpur Political States, and the two Orissa Feudatory States (Bonai and Gangpur) to which *ganja* was supplied on payment of duty, amounted to 19 maunds while duty-free exports to the other Feudatories in Orissa amounted to 16 maunds.

Charas.

36. *Supply, duty and vend arrangements.*—The sale of *charas* has been prohibited in this province since the year 1924-25. In 1912-13, the use of *charas* confined to four districts, *viz.*, Gaya, the Santhal Parganas, Cuttack and Manbhum. The drug was procured either from the Punjab or from wholesale vendors in other provinces.

Bhang.

37. *Supply, duty and vend arrangements.*—*Bhang* grows wild in many parts of Bihar and Orissa, but collection for purposes of sale was permitted only in the district of Purnea. The whole quantity collected in Purnea was transported to the central *gola* at Bhagalpur whence it was sold according to requirements. The total requirements of the province, as well as of Bengal and Assam, which obtained their supplies of *bhang* from Bhagalpur, were estimated, and a contract was given to one person for the collection and storage of that quantity for supply to licensed wholesale vendors, subject to a fixed maximum price. The contractor was selected by tender with reference chiefly to the price at which he was prepared to supply the wholesale dealers He had to pay no fees for the exclusive privilege of collection and supply. The maximum price of supply, fixed for the period of three years commencing from the 1st April 1931 was Rs. 3-8-0 a maund. The *bhang* was collected and stored under the supervision of Excise Officers in a Government warehouse established at Bhagalpur and was issued thence to wholesale vendors under bond.

38. *Import and export.*—*Bhang* was also allowed to be imported by licensed wholesale vendors in the Champaran, Muzaffarpur and Saran districts from the Gorakhpur district of the United Provinces, but in 1932-33 there was no such import.

The wholesale vendors, who obtained their licenses free of charge, were required to keep their stocks of *bhang* in warehouses (*golas*) under Government supervision. Duty on the drug was paid by retail vendors at the time of its issue from the warehouses. The rate of duty per seer was Rs. 3 throughout the province, except in the North Gangetic tract, where it was Rs. 2.

The export of *bhang* was subject to conditions similar to those for *ganja* (*vide* paragraph 35 above). In 1932-33, 2 maunds were exported on payment of duty in Bihar and Orissa, to the Orissa Feudatory States and the Chota Nagpur Political States and 301 maunds in bond to Bengal and Assam. 3 maunds were also exported to the Orissa Feudatory States without payment of duty.

Licenses for retail sale of *bhang* were settled in all districts like licenses for retail sale of *ganja*, under the sliding scale and auction systems. Permits for the possession of *bhang* in excess of $\frac{1}{4}$th seer, but not exceeding 5 seers at a time, and for its retail sale for medicinal purposes only were also granted by Collectors to approved medical practitioners on payment of a nominal fee of Re. 1 for the year. In 1932-33 one license was granted for the collection and supply of *bhang*, 37 for wholesale vend, 296 for retail vend and 79 druggists' permits. The number of these licenses during the year 1912-13 and 1931-32 was as follows :—

	1912-13.	1931-32.
For collection and supply of *bhang*	3	1
For wholesale vend	44	36
For retail vend	278	289
Druggists' permits	19	74

39. *Consumption and average taxation.*—The consumption of *bhang* in the British districts of Bihar and Orissa in 1932-33 amounted to 166 maunds and the average taxation thereon was Rs. 11·8 per seer of which Rs. 3·0 were derived from duty and Rs. 8·8 from vend fees. The consumption of *bhang* in 1931-32 amounted to 180 maunds against 538 maunds in 1912-13. Average taxation per seer of *bhang* (duty and vend fees) was Rs. 9·2 in 1931-32 and Rs. 2·4 in 1912-13.

40. *Changes.*—No changes were introduced during the year under review.

41. *Offences and convictions.*—The number of persons convicted for illicit cultivation of the hemp plant was 73 in the year 1932-33, against 50 in 1931-32. 57 persons were convicted for unlicensed sale of *ganja* or *bhang* against 11 in the preceding year. There were 85 convictions for the illicit possession of *ganja* or *bhang* compared with 80 in the previous year. 458 persons were convicted for unlawful export or transport of *ganja* or *bhang* against 331 in the preceding year. The total number of convictions for offences relating to *bhang* and *ganja* in 1932-33 was 668 against 472 in the preceding year and 154 in 1912-13.

42. *Consumption and taxation statistics for ganja and bhang together.*— Taking *ganja* and *bhang* together, the total consumption of hemp drugs in the British districts of Bihar and Orissa in 1932-33 amounted to 919 maunds or 0·9 seer per 1,000 of population according to the census figures of 1931. In 1931-32 the average consumption of hemp drugs (various sorts taken together) per 1,000 of population amounted to 1·0 seer against 3·5 seers in 1912-13. The average taxation on consumption in 1932-33 was Rs. 32·2 per seer from duty and Rs. 32·4 from vend fees, or Rs. 64·6 per seer in the aggregate. The total taxation per seer during the preceding year was Rs. 62·8 against Rs. 16·9 in 1912-13. The duty-paid exports outside the province during 1932-33 amounted to 21 maunds on which a duty of Rs. ·30 lakh was realized.

CHAPTER VII.

UNITED PROVINCES OF AGRA AND OUDH.

43. *General revenue and statistics.*—The total receipts from hemp drugs for the year ending March 31, 1933, were 30·80 lakhs as shown below, being 25·0 per cent. of the total excise revenue :—

	Duty.	Vend fee, etc.	Total.
Ganja	3,15,389		
Charas	11,39,060	13,08,037	30,79,929
Bhang	3,17,443		
Total .	17,71,892	13,08,037	30,79,929

Receipts from hemp drugs during the year 1931-32, amounted to Rs. 30·86 lakhs, and were 28·3 per cent. of the total excise revenue. In 1912-13, the revenue from these drugs was Rs. 24·06 lakhs and the percentage that it bore to total excise revenue was 19·1.

A licence for the vend of hemp drugs covered the vend of all the three descriptions of hemp drugs.

Ganja.

44. *Supply and storage.*—No *ganja* was produced in this province and its import was permitted only from Bengal. The import had to be by railway and under bond and was required to be covered by a pass. The drug was required to be consigned to the Collector of a district in which a bonded warehouse established for the storage of hemp drugs was situated. Duty was levied on the net weight of *ganja* as it was issued from the warehouse to licensed vendors.

45. *Duty and consumption.*—The rates of duty levied per seer in each of the years 1912-13, 1931-32 and 1932-33, were as follows :—

On *baluchar ganja* obtained direct from Rajshahi (the district of production in Bengal).

1912-13.	1931-32.	1932-33.
Rs. a. p.	Rs. a. p.	Rs. a. p.
11 0 0	33 6 0	32 6 0
	34 2 0	33 2 0

The total consumption of *ganja* in 1932-33 was 242 maunds as compared with 248 maunds in 1931-32 and 408 maunds in 1912-13.

Charas.

46. *Supply.*—*Charas* comes from Central Asia through warehouses in the Punjab. Import from the Punjab was required to be made by rail only and covered by a pass. The drug had to be consigned, in the manner already described in the case of *ganja* to a bonded warehouse. Duty was levied on the net weight issued from the warehouse.

47. *Duty and consumption.*—In 1932-33, the duty varied from Rs. 55-4-0 to 56-8-0 per seer as in 1931-32, the duty in 1912-13 being Rs. 12 per seer.

An export duty of 2 annas per seer was levied on all *charas* exported from the United Provinces under bond. *Charas, ganja* and *bhang* were exported under bond to the Benares State from the Benares drugs warehouse. *Charas* was also allowed to be exported free of duty annually to Rampur and Tehri States up to the limits of 200 and 50 seers respectively.

The consumption of *charas* in the United Provinces in the year ending March 31, 1933, was 502 maunds against 507 maunds in 1931-32 and 1,254 maunds in 1912-13. A special staff consisting of 6 Excise Inspectors and peons was working on the borders of these two provinces to stop the smuggling of *charas* from the Punjab and Delhi Provinces which reduced duty on it to Rs. 20 a seer in 1928. Their efforts met with a certain amount of success.

Bhang.

48. *Production, taxation and consumption.*—The import of *bhang* into the United Provinces was prohibited. The only source of supply was the spontaneous growth of the wild hemp plant in the Himalayan submontane tracts. The collection of the plant was regulated by the issue of licences to supply contractors of hemp drugs. The cultivation of the hemp plant for the production of *bhang* was prohibited throughout the province since 1925-26. Its cultivation for fibre and seed was permitted in the hilly portion of the Kumaon Division.

The total consumption of the drug during the year was 2,939 maunds. In 1931-32, the quantity of *bhang* consumed was 2,916 maunds. In 1912-13 the total consumption of the drug was estimated at 4,996 maunds. The collection of the drug of spontaneous growth was restricted to the following districts, *viz.*:—

Saharanpur, Muzaffarnagar, Bijnor, Naini Tal, Bareilly, Kheri, Pilibhit, Bahraich, Gonda, Basti and Gorakhpur.

The duty on *bhang* varied from 10 annas to Rs. 3-4-0 per seer during the year and was the same as in 1931-32. In 1912-13, duty was levied at the rate of Rs. 4 per maund or Re. 0-1-7 per seer only on the transport of the drug from the districts of collection.

49. *Contract supply system.*—The contract supply system has been in force in all the 48 districts since April 1, 1924. It is analogous to the system of contract supply of country spirit. Under it the exclusive privilege of supplying intoxicating hemp drugs (*ganja, charas* and *bhang*) at fixed rates to a particular tract is granted for a definite period to a supply contractor. The contracts are fixed by tender. Usually the lowest tender is accepted, but full power is reserved to accept such tender as may be deemed best in the public interest.

Drugs were issued to retail vendors on prepayment of the contract price and duty, from bonded warehouses within the contract area of supply. Portions of the buildings of the bonded warehouses already established for the contract supply of country spirit were utilised for the storage and issue of all the three varieties of hemp drugs. There were 78 such warehouses. The drugs were transported or imported, as required, to the warehouses under bond by the contractors.

50. *General vend arrangements.*—As stated in paragraph 43 above one licence covered the right to sell hemp drugs of all the three descriptions. In 1932-33, there were 2,162 retail shops. Shops were settled, licensees were selected and the collection of fees effected in the manner prescribed in paragraph 202, Chapter VII of the Memorandum on Intoxicating liquors for 1931-32. In 1931-32, there were 2,112 retail shops against 102 wholesale and 3,463 retail shops during the year 1912-13. The fixed selling price of *ganja* and *charas* was Rs. 100 and Rs. 120 per seer respectively and that of *bhang* was Rs. 5 a seer except in the submontane districts where it was sold at Rs. 2-8-0 a seer.

51. *Administrative changes.*— The important administrative changes during the year were as follows :—

(1) Settlements of contracts for the supply of hemp drugs in the United Provinces for the triennium 1933-36.

(2) Fixation of the quantity of the *charas* to be suplied free of duty to the Benares, Rampur and Tehri States.

52. *Prosecutions and convictions*—The facilities and temptations offered by the prevalence of low rates of duty on *charas* in Delhi, the Punjab and the N. W.-F. P. and the nominal prices at which it could be obtained at source, continued to exist and consequently the unlawfully obtained articles continued to be smuggled into these provinces.

The district preventive staff exercised such vigilance as was possible but the efforts of the special Excise staff appointed 5 years ago are, as stated in paragraph 47 above, meeting with a certain amount of success.

The total number of prosecutions relating to hemp drugs rose from 513 in 1931-32 to 547 in 1932-33.

Since the introduction of the auction system in the districts of Bihar bordering on the United Provinces and the consequent reduction in prices, *ganja* is being smuggled from that province in small quantities for private consumption.

Petty smuggling of *ganja* from Nepal and the Bundelkhand States for private consumption also continues.

Crime in connection with *bhang* is not of much importance at present though the proximity of the submontane portion of Nepal offers temptations to smugglers. Sporadic cases were detected but organised smuggling was not suspected.

451 seers of *charas* was seized in 1932-33 against 251 seers during the preceding year. The special staff was responsible for the seizure of 317 seers.

53. *Total consumption of hemp drugs and average taxation.*—Taking *ganja*, *charas* and *bhang* together, the total consumption of hemp drugs in the United Provinces, was 3,683 maunds in 1932-33 or 3·04 seers per 1,000 of the population, according to the census figures of 1931, and the average taxation thereon amounted to Rs. 20·9 per seer of which Rs. 12·0 were derived from duty. In 1931-32, the total consumption of hemp drugs of various descriptions taken together, amounted to 3,671 maunds against 6,658 maunds in 1912-13. The average total consumption of hemp drugs per 1,000 of the population amounted to 3·2 seers in 1931-32, against 5·6 seers in 1912-13. The average taxation per seer of hemp drugs (of all sorts taken together) was Rs. 21·0 in 1931-32, against Rs. 9·0 in 1912-13.

CHAPTER VIII.

PUNJAB.

54. *General revenues statistics.*—The principal source of revenue from hemp drugs in the Punjab is *charas*. The amount recovered from the duty on *charas* including warehouse dues was Rs. 6·52 lakhs as compared with Rs. 0·28 lakh from the transport duty on *bhang* and Rs. 5·14 lakhs from license fees for the vend of *charas* and *bhang*, making a total of Rs. 11·94 lakhs. The corresponding figures in the previous year were Rs. 5·72, 0·19, and 5·80 making a total of Rs. 11·71 lakhs.

Charas.

55. *Import, duty, possession and local consumption.*—*Charas* grows on the flowers of the female hemp plant in Central Asia only. It does not materialise on the hemp plant in India. It is collected in the form of a powder and kneaded into a sticky mass, under the heat of the sun. It was transported *via* Panamik where it was first registered by a clerk, to Leh in Kashmir State territory, where the Punjab Government had established a warehouse and maintained a special staff. Each bundle of *charas*, which ordinarily weighed 50 seers or a little less, was recorded in the warehouse and was forwarded either to Kulu or to Rawalpindi, or else consumed in Kashmir State territory under the direct control of the Durbar. There were four warehouses in the Punjab at Sultanpur (Kulu), Hoshiarpur, Amritsar and Rawalpindi. On arrival at each of these warehouses the bundles were again registered. Transport after leaving Leh, was only permitted in bond under a pass.' Warehouses were also established in the North-West Frontier Province and *charas* was imported from Chitral in bond into the Punjab. The strict control and supervision exercised in this manner over imports minimised the risk of illicit importation, which could only take place, if the smuggler was prepared to smuggle the *charas* the whole way from Central Asia into India. *Charas* could not be kept in a warehouse for more than two years, after which it had either to be destroyed or released from bond on payment of the duty, which since July 1928 stood at Rs. 20 a seer. Warehouse dues were charged for the safe custody of *charas* kept in a Government warehouse. *Charas* was purchased from the wholesale import dealers either by retail vendors or by wholesale vendors who supplied to the retail vendors. The fee for a wholesale license in bond for import was Rs. 5 per annum, and for a wholesale license out of bond Rs. 16. This out of bond license also covered the wholesale of *bhang*. Licenses for the retail vend of *charas* and *bhang* were auctioned at the same time as liquor licenses each year. The fixed maximum retail price for *charas* was reduced to nine annas per tola when the duty was reduced to Rs. 20 per seer but it was raised on April 1st, 1931, to twelve annas. The maximum limit of private possession for *charas* was three tolas. The total sales of *charas* for consumption in the Punjab in 1932-33 were 382 maunds as compared with 378 maunds in the previous year and 637 maunds in 1912-13. The raising of duty to Rs. 60 per seer gave rise to much smuggling with the result that licit consumption greatly declined but recovered when the duty was reduced to Rs. 20.

56. *Charas contracts.*—Owing to the dealers in *charas* having combined to force up the price of *charas* to an unreasonably high level, the Punjab Government acting in co-ordination with the Governments of Bengal and North-West Frontier Province, and the administrations of Baluchistan, Delhi and Ajmer-Merwara, and following to some extent the example of the United Provinces Government, arranged to call for tenders in advance for the wholesale

supply of *charas*, thus bringing down the price exclusive of duty which had risen in 1930 as high as Rs. 6 per seer to about Rs. 5-8-0 per seer in 1931-32, Rs. 4 per seer for delivery in 1932-33 and Rs. 2 in 1933-34. Subsequently many Indian States in the Punjab, Rajputana and Central India arranged through the Punjab Government for similar contracts at rates of about Rs. 2 per seer for both 1932-33 and 1933-34. The reduction of about Rs. 4 per seer in the wholesale price of *charas* was equivalent to a saving for the various administrations in India concerned of about three lakhs of rupees a year. This money had not previously all gone into the pockets of the wholesale dealers, since, owing to rivalry among themselves they imported each year amounts far in excess of the annual requirements of the country. Hundreds of maunds of *charas* thus had to be destroyed, when the drug had deteriorated so as to be unfit for consumption. In future the dealers will know their requirements in advance, and will be able to arrange their imports accordingly.

Bhang.

57. *Cultivation and taxation.*—The hemp plant grows wild in the sub-montane districts of the Punjab and cultivation was unrestricted in the districts of Ambala, Simla, Jullundur, Hoshiarpur, Gurdaspur, Kangra, Rawalpindi, Attock and Dera Ghazi Khan. In other districts cultivation was prohibited except in small plots of land and under special license by fakirs and other persons attached to religious institutions for their own consumption. Such persons paid no acreage duty. An import, transport and export duty was levied on *bhang*. This in 1930-31 stood at Rs. 6 a maund and was raised from April 1st, 1931, to Rs. 10.

58. *Vend of bhang and charas.*—53 wholesale licenses were issued for the wholesale vend of *bhang* and *charas* in 1932-33 as against 57 in the previous year and 75 in 1912-13. The retail vend licenses were disposed of by auction at the same time as the liquor auctions. Most of the shops auctioned were for the sale of both drugs. In 1932-33 there were 175 shops for the sale of both *charas* and *bhang* and 105 separate shops for *charas* and 103 separate shops for *bhang*, as compared with 174, 105 and 102 in the previous year and 396, 96 and 49 in 1912-13.

59. *Total consumption and the average taxation.*—The total consumption of both *charas* and *bhang* in 1932-33 was 2,191 maunds giving an average consumption of 3·71 seers per thousand of the population according to the census figures of 1931 and an average taxation of Rs. 7·33 per seer. The corresponding figures for 1931-32 were 6·47 and for 1912-13 Rs. 6·3 per seer.

Ganja.

60. *Ganja.*—The use of this product of the hemp plant was prohibited in the Punjab.

61. *Offences with regard to charas.*—The reduction in the duty on *charas* from Rs. 60 to Rs. 20 a seer caused a great decrease in the smuggling of *charas* into the Punjab for local consumption. At the price now ruling it was hardly worth while for smugglers to bring *charas* into the Punjab except for export to such provinces, as the United Provinces and Bengal, where the duty remained at Rs. 60 a seer, or to other provinces, such as Bombay and Central Provinces, where the consumption of *charas* was absolutely prohibited. The total quantities of contraband *charas* seized during 1932-33 and the two previous years were 17, 9 and 12 maunds.

CHAPTER IX.

CENTRAL PROVINCES AND BERAR.

62. *General revenue statistics.*—The hemp drugs receipts for the calendar year 1932 amounted to Rs. 6,41,000,* being 11·2 per cent. of the total excise revenue for that year (including cost price of opium). In 1931 the hemp drugs receipts amounted to Rs. 7,45,000 † against Rs. 7,40,000 in 1912-13, and the revenue from these drugs represented 10·8 per cent. of the total excise revenue in 1931 against 7·0 per cent. in 1912-13.

Ganja.

63. *Source of supply.*—The cultivation of the hemp plant for the production of *ganja* was restricted to the Khandwa tahsil of the Nimar district, and was there carried on under license, the cultivators being bound to harvest their crop under Government supervision, and to store the produce in a Government storehouse, whence it was issued to local bonded warehouses for consumption in the British districts and Central Provinces States of the province. All issues were made under the supervision of a responsible Government officer of the rank of District Excise Officer.

The Nimar district at one time produced sufficient *ganja* not only to meet the demands of the Central Provinces and Berar, but to allow of large exports to the United Provinces and to numerous States outside the province such as Gwalior, Indore, Rewa and Bhopal. From the year 1892, however, the export trade gradually declined and no *ganja* was exported, except to Berar, between the years 1899-1900 and 1906-7. The amount of *ganja* produced declined simultaneously with the demand for export, and is now just sufficient to meet the demands of the Central Provinces and Berar.

64. *Duty and vend arrangements.*—*Ganja* intended for consumption in the Central Provinces and Berar was issued from the Khandwa storehouse, and was stored in a Government warehouse at the headquarters of most of the tahsils and at other warehouses. From the warehouses the *ganja* was issued to retail vendors who paid duty on the quantity they purchased.

The rate of issue price of *ganja* was Rs. 55 per seer as compared with Rs. 7-8-0 duty in 1912-13. This was the same as in the previous year except that the price of the old *ganja* of the crop of 1929-30 was reduced from Rs. 55 to Rs. 40 per seer, with effect from the 16th June 1932, as the drug had deteriorated. A new system was introduced at the close of the year 1918-19. Wholesale vendors were eliminated, and the entire crop was purchased by Government and supplied direct to the retail vendors at a fixed price. The cost price of *ganja* was fixed at Rs. 2-8-0 per seer throughout the Province in contrast to the fluctuating and often widely divergent prices previously charged by wholesale vendors. The result was an increase in license fees, a net gain on the sale proceeds of *ganja* and a regular supply of the drug in all shops.

In 1932, *ganja* cultivators were paid at the same rate as last year, *viz.*, Re. 0-11-0 per seer of cleaned *ganja*. The cultivation was confined to the villages of Badgaon Gujar (for *ganja*) and Dhanwara (for seed).

The right of retail vend is disposed of annually by auction for each shop separately. The number of shops in 1932 was 697 against 706 in the preceding year and 1,035 *plus* 4 temporary shops in 1912-13.

---

* The statistics of revenue are in each case given to the nearest thousand rupees.
† Including cost price.

65. *Consumption, revenue and average taxation.*—The sales of *ganja* to retail vendors in the British districts of the Central Provinces and Berar in 1932 amounted to 195 maunds, and the revenue realized from the drug was Rs. 3,88,000 from issue price on issues to the retail vendors from warehouses, and Rs. 2,16,000 from license fees for the privilege of retail vend. The average taxation from vend fees thus amounted to Rs. 27·7 per seer on *ganja* sold to the retail vendors. Adding to this issue price at the average rate of Rs. 47·5 per seer, the total average taxation on such sales amounted to Rs. 75·2 per seer.

In 1931 the sales of *ganja* to retail vendors in the British districts amounted to 192 maunds against 1,178 maunds in 1912-13, and the revenue realized from the drug in 1931 amounted to Rs. 4,22,000 from issue price and Rs. 2,89,000 from fees for the retail vend against Rs. 3,59,000 from duty and Rs. 3,33,000 from fees for the retail vend in 1912-13. The total average taxation per seer in 1931 amounted to Rs. 92·6 (37·6 from vend fees) against Rs. 14·6 (7·1 from vend fees) in 1912-13.

66. *Supply to Feudatory States.—Ganja* was supplied free of duty to the Central Provinces States other than those transferred from Bengal in 1905. The States were bound not to permit the cultivation of the hemp plant in their territories, nor to issue the drug to their licensed vendors at a lower rate than the retail vendors of the province had to pay for it. The Feudatory States transferred from Bengal in 1905 were charged full duty rates. The amount supplied to the Central Provinces States in 1932 was 11 maunds against 9 maunds in the preceding year and 111 maunds in 1912-13.

Bhang.

67. *Average taxation and vend arrangements.—Bhang* was imported from Hoshiarpur in the Punjab, and was stored in the Government godown at Khandwa, whence it was supplied to warehouses in the province for issue to retail vendors at a fixed price. The issue price of Rs. 9 per seer in 1930 remained unchanged against duty Rs. 2 in 1912-13. It was retailed, in special shops. The number of such shops in 1932 was 50 against 49 in the preceding year. In 1912-13, the number of shops licensed for the exclusive sale of *bhang* was 12. As in the case of *ganja* the right of vend was disposed of by auction and the revenue realized therefrom amounted to Rs. 15,000 in 1932 against Rs. 14,000 in 1931 and Rs. 5,000 in 1912-13. The issue price on *bhang* issued from warehouses to retail vendors in 1932 was Rs. 19,000 against Rs. 18,000 in 1931 and Rs. 5,000 in 1912-13, and the quantity sold was 54 maunds as against 51 maunds issued in 1931 and 60 maunds in 1912-13. The average taxation from vend fees on the sales to the retail vendors thus amounted to Rs. 7·0 per seer in 1932 against Rs. 6·9 per seer in 1931 and Rs. 2·1 per seer in 1912-13. Adding to this the issue price, the total average taxation realized from the drug was Rs. 16·0 per seer in 1932 against Rs. 15·9 per seer in 1931 and Rs. 4·1 per seer in 1912-13.

Charas.

68. Prior to 1906-7, there was no licit sale of *charas* in the Central Provinces or Berar; but in that year and the year following, shops were licensed for the first time. The drug was purchased by Government and supplied only at one place in the province, *viz.*, Jubbulpore, for the convenience of sepoys from the Punjab.

The only shop at Jubbulpore was closed permanently in the middle of August 1924, and thus the licit sale of the drug was discontinued throughout the province.

69. *Important change.*—The issue price of *bhang* was raised from Rs. 7 to Rs. 9 per seer in 1930, and continued to be in force in 1932.

70. *Offences, convictions and seizures.*—There were 26 cases of illicit cultivation of the hemp plant against 28 in the preceding year and 18 in 1912-13. Cases relating to smuggling and possession in excess of the legal limit increased from 92 in 1931 to 263 in 1932 under *ganja* and 6 in 1931 to 71 in 1932 under *bhang*, and 275 in 1931 to 331 in 1932 under *charas*. The total number of offences relating to hemp drugs in 1932 was 905 against 636 in the preceding year and 63 in 1912-13.

The total quantities seized in 1932 were 14 seers of *ganja* against 16 seers in 1931, 4 maunds 58 tolas of *charas* against 35 seers and 77 tolas in 1931 and 17 seers 42 tolas of *bhang* against 1 seer in 1931.

71. *Consumption of and average taxation on ganja, bhang and charas taken together.*—The total consumption in British districts of the Central Provinces and Berar of licit *ganja* and *bhang* taken together in 1932 was 249 maunds, being at the rate of 0·6 seer per 1,000 of the population according to the census figures of 1931. The general average taxation was Rs. 64 per seer of which Rs. 47 were derived from issue price. The average consumption of hemp drugs per 1,000 of population was 0·6 seer in 1931 and 3·6 seers in 1912-13, and the average taxation per seer of hemp drugs amounted to Rs. 77 (55 from issue price) in 1931 against Rs. 14·6 (7·5 from duty) in 1912-13.

CHAPTER X.

ASSAM.

72. *General revenue statistics.*—The revenue derived from hemp drugs, *ganja*, *bhang* and prearations thereof during the year 1932-33 was Rs. 4,03,508 as shown below, amounting to 9·9 per cent. of the total excise revenue :—

	Duty.	Vend fee.	Total.
	Rs.	Rs.	Rs.
Ganja	2,81,680	1,21,828	4,03,508
Bhang	Nominal	Nominal	Nominal

In 1931-32, the total receipts from hemp drugs amounted to Rs. 5,61,290 as against Rs. 6·88 lakhs in 1912-13. The percentage of revenue from hemp drugs to total excise revenue was 10·9 in 1931-32 against 14·2 in 1912-13.

Ganja.

73. *Supply and vend arrangements.*—Warehouses for storage of *ganja* were maintained under Government supervision at almost all district and sub-divisional headquarters by licensed wholesale vendors. They obtained their supplies either direct from the Naugaon *Ganja* Cultivators' Co-operative Society Limited in the district of Rajshahi in Bengal or from other wholesale vendors. Retail vendors were required to take their requirements from these warehouses, duty and license fees being charged at the time of issue. The limit of retail sale of the drug was 3 tolas. The number of wholesale and retail licenses were 25 and 245 in 1932-33 against 26 and 241 of which 5 licenses remained unsettled in 1931-32 respectively. In 1912-13 the numbers were 47 and 245.

74. *Duty, consumption and average taxation.*—Duty was levied on all descriptions of *ganja* on issue from the wholesale vendors' *gola* at the uniform rate of Rs. 60 per seer throughout the province except in Goalpara where it was levied at Rs. 35 per seer, against the same rates in 1931-32, and Rs. 11 in 1912-13. In practice only the *chur ganja* was used in 1932-33 (*Chur ganja* consists of the broken pieces of the flower which drop off in making flat and round *ganja*). The drug was consumed in all districts except the Lushai Hills. In the other hill districts, the consumption was confined to plainsmen. The total consumption in 1932-33 amounted to 122 mds. 27 srs. against 159 mds. 33 srs. and 846 mds. 24 srs. in 1912-13. The retail price per tola of excise *ganja* was Re. 1-4-0 in all districts except Goalpara (Re. 1 a tola) in 1932-33 and 1931-32 against 0-3-0 to 0-8-0 a tola in 1912-13. This high retail price and the large seizures of smuggled article in course of the year pointed to the urgency of reducing the retail price. In one case in Darrang 11 mds. 35 srs. of Bhutia *ganja* were seized, another big seizure of 1 maund 15 seers of *ganja* grown in the Khasi Hills took place in Sylhet. Accordingly it was decided with effect from the 1st April 1933 to revert to the former price of 0-12-0 annas a tola.

The average taxation on *ganja* in 1932-33 was Rs. 82·2 (Rs. 57·4 from duty and Rs. 24·8 from vend fees) against Rs. 87·7 per seer (Rs. 57·3 from duty and Rs. 30·4 from vend fees) in 1931-32 and Rs. 20·3 per seer (Rs. 11·1 from duty and Rs. 9·2 from vend fees) in 1912-13.

Bhang.

75. *Supply, duty and vend arrangements.*—The cultivation of the hemp plant was forbidden but its wild growth was so extensive that the only restriction hitherto found feasible in regard to the possession of *bhang* had been to fix a limit of a quarter of a seer per individual, the possession of any larger quantity requiring a special license. The exception from the provisions of the Excise Act in respect of the spontaneous growth of the hemp plant in its green state collected for *bonâ fide* medicinal purposes or for cattle, or for the manufacture of fibre and not for use as intoxicant, or for sale, was cancelled. In the year 1932-33 only 2 licenses for retail sale were taken out. The retail vendors obtained their supplies from outside the province. Duty was levied at the rate of 0-8-0 per seer at the time of issue of passes to the retail vendors. Thirty-seven druggists' permits were issued on payment of a fee of Rs. 3 each for the sale by medical practitioners of medicinal preparations containing *bhang*. In 1931-32, there were 32 such permits against 3 in 1912-13. The total fees amounted to Rs. 223 as compared with Rs. 210 in the preceding year.

76. *Consumption and average taxation.*—The consumption of *bhang* in 1932-33 was 12 seers against 1 md. 10 srs. in 1931-32 and 5 mds. 9 srs. in 1912-13. The average taxation thereon in 1932-33 was Rs. 18·9 per seer against Rs. 4·52 in 1931-32 and Rs. 1·64 per seer in 1912-13.

77. *Offences and convictions.*—The total number of offences relating to hemp drugs detected in 1912-13, 1931-32 and 1932-33 were 52, 327 and 414 respectively. Among the cases of 1932-33, 119 were for illicit possession and sale of hill *ganja* and 172 for illegal importation of hill *ganja*.

78. *Consumption of and taxation on all description of hemp drugs taken together.*—Of *ganja* and *bhang* taken together the total consumption in the province in 1932-33 amounted to 122 mds. 39 srs. or ·56 seer per 1,000 of population. In 1931-32 the figure was 161 mds. 3 seers or ·74 seer per 1,000 of population against 5·1 seers in 1912-13.

CHAPTER XI.

N.-W. F. Province.

79. *Import duty and consumption.*—The *charas* required for consumption in the province was obtained direct from Central Asia *via* Chitral. Provincial requirements were met from the stock of Chitral *charas* stored in the Peshawar warehouse. The issue price to retailers was Rs. 23-12-0 (Rs. 20 duty and 3-12-0 cost price).

In 1928-29, the rate of duty on *charas* issued from the warehouse was reduced from 60 to 20 a seer while in 1912-13 it was only Rs. 12 a seer. The receipts under this head, during the year under report, amounted to Rs. 24,800 against 30,446 and 23,079 in 1931-32 and 1912-13, respectively.

The consumption of *charas* in the province in 1932-33, as shown by the licit sale returns was 1,226 seers as compared with 1,590 seers in the preceding year and 3,844 seers in the year 1912-13. The figure was indicative of a fall in the licit sale of this drug, due to the increasing consumption of smuggled *charas* which was readily available at nominal price from across the neighbouring borders. Even after the reduction of duty from Rs. 60 to Rs. 20 a seer in 1928 and fixation of the sale rate of *charas* at As. 9 per tola the contraband *charas* could still be had at annas two per tola. The difference in cost between the licit and illicit *charas* which subsisted notwithstanding the reduction of duty and fixation of sale rates was an obvious incentive to smugglers. Under the circumstances it was doubtful whether in view of the vend fee *plus* the cost price of licit *charas* even the entire elimination of Government duty would enable licit *charas* to compete with smugglers *charas*.

80. *Revenue.*—Revenue from hemp drugs (*charas*, *bhang* and preparations thereof) was for the year 1932-33, Rs. 64,665 against Rs. 69,495 in the preceding year and Rs. 1,36,000 in the year 1912-13.

81. *Charas.*—Bonded warehouses were maintained during the year at the headquarters of all districts for storage of the drug until cleared for consumption by payment of duty. Duty stood at Rs. 60 per seer till July 1st, 1928, when it was reduced to Rs. 20 a seer.

82. *Revenue from licenses.*—The receipts from license fees in 1932-33 amounted to Rs. 38,666, against Rs. 38,267 in 1931-32 and Rs. 2,432 (for *charas* and bhang together) in 1912-13.

83. *Bhang, cultivation and taxation.*—*Bhang* grows wild in almost all parts of the province. In a few instances its cultivation under license was allowed as a concession to certain shrines in D. I. Khan district. The limit of private possession of this drug was one seer only.

84. *Import, export and transport.*—A duty of Rs. 2-8-0 per quarter of a maund of *bhang* was levied (*a*) on import into the province and (*b*) on transport within the province or to places outside the province ; unless such transport took place under bond for the repayment of the import duty leviable in the province of consumption. *Bhang* could be imported into the province from :—

(*a*) foreign territory situated to the west of the Indus or Kashmir and

(*b*) the Punjab, by any person holding a license to sell the drug wholesale or retail. In the case of imports from foreign territory, it was necessary to obtain a permit from the Collector of the district into which the *bhang* was to be brought on first reaching British India. Imports

from the Punjab could be made only under a transport-in-bond pass obtained from the Collector of the district of origin in the Punjab on the production of a permit from the proper officer of the importing district.

85. In 1932-33, the *charas* consumed in the N.-W. F. P. was imported from the Punjab and Rs. 1,175 realized as duty thereon were credited into the North-West Frontier Province.

86. *Vend arrangements for charas and bhang.*—The right of retail vend of *charas* and *bhang* in separately sanctioned shops was sold by auction. Most of these shops were for the sale of both drugs. In the year 1931-32 and 1932-33, there were respectively 57 and 51 shops for the sale of *charas* and *bhang* together against 56 in 1912-13. There was also one shop for the exclusive sale of *charas* in each of the year 1931-32 and 1932-33, against 18 in 1912-13. There was also one *bhang* shop in the year 1912-13.

87. *Ganja.*—*Ganja* was not consumed in the province and its import and possession were prohibited.

88. *Offences and convictions.*—The number of persons convicted for serious offences in respect of hemp drugs in 1932-33 was 93 against 55 in the preceding year and 9 in 1912-13. Convictions for minor offences were obtained in the case of 8 persons in 1932-33 against 8 in 1912-13 and two in 1931-32.

89. *Total consumption and average taxation.*—Taking *charas* and *bhang* and other preparations of hemp together, the total consumption in 1932-33 was 7,395 seers against 7,718 seers in the preceding year and 10,155 seers in the year 1912-13. The average consumption of hemp drugs (various sorts together) per 1,000 of population in 1932-33 was 3·09 seers against 3·42 seers in 1931-32 and ·5 seer in 1912-13. The average total taxation per seer on hemp drugs in 1932-33 was Rs. 51·53 (Rs. 31·53 from vend fee and Rs. 20 from duty) against Rs. 44·06 (Rs. 24·06 from vend fee and Rs. 20 from duty) in 1931-32 and Rs. 13·4 in the year 1912-13.

90. *Preventive staff.*—In addition to the post of Excise Sub-Inspector, Bannu, the posts of Bureau Sub-Inspector and 22 Excise detectives were retrenched with effect from the 15th December 1931, as a measure of economy. The remaining detective excise staff of one Inspector and two Sub-Inspectors were centralized in the Excise Intelligence Bureau. The fall of licit consumption under all heads due to the revival of illicit distillation and smuggled drugs being sold at far cheaper rates only suggested the strengthening of the existing excise preventive machinery as no reduction in the duty on liquor or drugs could effectively check the prevalence of much cheaper intoxicants.

CHAPTER XII.

DELHI.

91. *General revenue.*—The revenue accruing from the sale of hemp drugs in the Delhi Province for the year 1931-32 and 1932-33 was Rs. 2,11,982-4-0 and Rs. 1,72,107-4-0 respectively against Rs. 66,883 during the year 1912-13.

These receipts were derived from license fees and duty on hemp drugs consumed in the Province.

92. *Charas and Bhang.*—All *charas* and *bhang* consumed in Delhi were imported in bond from the Punjab on payment of duty in the local treasury. For this purpose a warehouse was established at Delhi with effect from 1st April 1917.

93. *Consumption of charas.*—The total consumption of *charas* and *bhang* in Delhi during the years 1931-32 and 1932-33 compared with the figures for 1912-13 is indicated by the following table :—

	1912-13.	1931-32.	1932-33.
1. *Charas*	3,895	3,581	2,915 seers.
2. *Bhang*	4,071	5,351	2,297 ,,

The decrease in the sale of *charas* without any change either in duty or sale rate was probably due to economic depression amongst the class of persons addicted to the drug. Regarding *bhang*, its use as an alternative for country spirit and keen competition amongst licensees was reported to have stimulated its sales from 4,254 seers in 1930-31 to 5,351 seers in 1931-32. During 1932-33 while the sale of country liquor showed an increase, the fall in sales of *bhang* seemed due to low purchasing power of the people addicted to its use.

94. *Retail vend.*—The right of retail vend of *charas* and *bhang* was sold by public auction. There were six shops each for the sale of *charas* and *bhang* during the year 1932-33 as was the case last year. The number of such shops in 1912-13 was 8 and 7 respectively.

95. *Wholesale vend.*—Wholesale licenses were granted at a fixed fee of Rs. 16 per annum while a wholesale-in-bond license was charged at the rate of Rs. 5 per annum. There was only one wholesale dealer in Delhi in the years 1931-32 and 1932-33 against 3 in 1912-13.

96. *Duty.*—The rates of duty levied in the Delhi Province were as follows :—

	1912-13.	1931-32.	1932-33.
	Rs. a. p.	Rs. a. p.	Rs. a. p.
1. *Charas* per seer	10 0 0	20 0 0	20 0 0
2. *Bhang* per quarter maund or fraction thereof.	1 0 0	2 8 0	2 8 0

97. *Offences and convictions.*—The number of persons arrested and convicted was 38 and 24 respectively for the year 1932-33.

98. *Total consumption and average taxation thereon.*—The total consumption of *charas* and *bhang* in 1931-32 and 1932-33 amounted to 8,931 and 5,212 seers respectively against 7,966 seers in 1912-13. The average consumption per 1,000 of population calculated on the census returns of 1912, 1931 and 1932, was as follows :—

1912-13.	1931-32.	1932-33.
19·91	14·06	8·2 seers.

99. *Ganja.*—The possession and sale of *ganja* was absolutely prohibited in the Delhi Province.

CHAPTER XIII.

AJMER-MERWARA.

100. *Description of Excise system formerly in force.*—Up to the year 1898-99 the traffic in hemp drugs (*ganja*, *charas*, *bhang* and preparations thereof), was practically subject to no control in Ajmer-Merwara except that the monopoly of vend of the drugs throughout the territory, in shops, fixed by the local authorities, was sold by auction for annual or (in special cases) triennial periods. The hemp plant was not locally cultivated. *Charas* continued to be imported from the Punjab and *ganja* from Central India, but the contractors were at liberty to obtain their supplies whence they pleased.

101. *Revised arrangements introduced since 1899-1900.*—With effect from the 1st April 1899, revised rules for the regulation of the hemp drugs traffic in Ajmer-Merwara were brought into operation with reference to the recommendations of the Hemp Drugs Commission, and the orders of the Government of India thereon, the principal provisions of which are enumerated below :—

(1) The cultivation of the hemp plant in Ajmer-Merwara was absolutely prohibited.

(2) The import of hemp drugs into the district was permitted only by rail through the Ajmer railway station and under cover of a pass from the Collector of Ajmer-Merwara and subject to the following conditions, *viz.* :—

(*a*) that the import should be under bond for payment in Ajmer-Merwara of the duties leviable on the drugs imported ; and

(*b*) that the drugs should be consigned by the importer direct to the Collector of Excise Revenue, Ajmer-Merwara, and should be forthwith removed to a bonded warehouse established at Ajmer and kept there until issued for consumption on payment of duty.

102. The only persons authorised to import were the licensed vend contractors of hemp drugs.

(1) The quantitative duties leviable on the drugs during the years 1912-13, 1931-32 and 1932-33 were as follows :—

——	1912-13.	1931-32.	1932-33.
	Rs. A.	Rs.	Rs.
Ganja per seer	7 5	10	10
Charas per seer	10 0	60	60
Bhang and *majun* per maund . . .	5 0	6	6

(2) The arrangements for the vend of the drugs described in paragraph 100 above were continued.

103. The number of retail shops sanctioned under the above arrangements in each of the year 1912-13, 1931-32 and 1932-33 was 16. The total receipts from duty and vend fees combined amounted in 1932-33 to Rs. 60,180 (representing 9·51 of the total Excise revenue) as compared with Rs. 59,797 (or 9·40 per cent. of the total Excise revenue) in 1931-32 and Rs. 18,000 (or 5·1 per cent. of the total Excise revenue) in 1912-1913. Taking all descriptions of hemp drugs together, the average consumption thereof per 1,000 of population was 7·1 seers in 1932-33 as compared with 6·9 seers in the preceding year and 6·5 seers in the year 1912-13. The total average taxation per seer thereon in 1932-33 amounted to Rs. 14·98 (Rs. 12·81 from duty and the balance from vend fees) as compared with Rs. 15·46 (Rs. 12·68 from duty and the balance from vend fees) in the preceding year and Rs. 5·6 (Rs. 2·5 from duty and the balance from vend fees) in 1912-13.

The consumption figures for these years were as under :—

	1912-13.		1931-32.		1932-33.	
	Mds.	Srs.	Mds.	Srs.	Mds.	Srs.
Charas	17	14	19	22	19	34
Ganja	0	22	1	20	1	2
Bhang	51	39	63	9	66	34
Majun	11	1	12	15	12	24
Total	80	36	96	26	100	16

CHAPTER XIV.

Coorg.

104. *Supply, Vend, etc., of ganja.*—*Ganja* was the only hemp drug in use in the Province. *Ganja* consists of the dried flowering tops of cultivated female hemp plants which have become coated with resin in consequence of having been unable to seed freely. Its cultivation was strictly prohibited in Coorg. *Ganja* required for sale was obtained from the Mysore Darbar. The wholesale supply and vend was conducted by the Government through the treasury department. The drug was issued from the treasury at Rs. 27-8-0 a seer against the same figure in 1931-32 and Rs. 7-8-0 a seer (80 tolas) in 1912-13.

105. *Retail vend, etc.*—The number of retail shops in 1932-33 and 1931-32 was 4 and 2 respectively against 5 in 1912-13. The right to sell in these shops was auctioned annually.

106. *Revenue, etc.*—The rental realised in 1932-33 was Rs. 3 550 against Rs. 3,170 in 1931-32 and Rs. 1,023-8-0 in 1912-13. The total revenue derived under this head in 1932-33 was Rs. 6,789-2-0 against Rs. 6,357-9-6 in 1931-32 and Rs. 6,580 in 1912-13.

107. *Consumption.*—The quantity of *ganja* consumed in 1932-33 was 117·63 seers or 0·72 seer per 1,000 of population against 115·15 seers or 0·71 seer per 1,000 of population in 1931-32 and 741 seers or 4·2 seers per 1,000 of population in 1912-13.

CHAPTER XV

BALUCHISTAN.

108. *General revenue statistics*—The revenue from hemp drugs for the year 1932-33 amounted to Rs. 69,300 being about 12·0 per cent. of the total excise receipts. Rs. 39,200 of this amount were derived from vend fees and warehouse dues and Rs. 29,000 from duty.

In 1931-32 the total receipts from hemp drugs amounted to Rs. 59,300 (Rs. 31,000 from vend fees and warehouse dues and the balance from duty), against Rs. 26,000 (Rs. 15,000 from vend fees and warehouse dues and the balance from duty) in 1912-13. In 1931-32 the receipts from hemp drugs bore a percentage of 9·8 to the total excise revenue, while in 1912-13 the hemp drugs receipts represented 9·3 per cent. of the total excise receipts.

109. *Vend arrangements and cultivation.*—The cultivation of the hemp plant was absolutely prohibited. The contracts for the wholesale and retail vend of hemp drugs were granted separately in all districts, there being in the year 1932-33, 4 wholesale shops and 38 retail shops against 4 wholesale shops and 39 retail shops in the year 1931-32. In 1912-13 there were 9 wholesale and 68 retail shops.

110 *Source of supply and statistics of consumption.*—The sources from which the supply of hemp drugs required for consumption in Baluchistan was derived, were the Punjab, Sind and Bombay. *Charas* was imported from the Punjab, *bhang* mainly from Sind and *ganja* from Ahmednagar in Bombay. The consumption of the last mentioned drug was, however, exceedingly limited.

The statistics of import and sale for 1932-33 were as follows, but figures relating to sale being those furnished by the licensed vendors, were not quite reliable.

Description of hemp drugs.	Quantity imported.				Quantity sold.	
	From British Provinces.		From Afghanistan.			
	Mds.	Srs.	Mds.	Srs.	Mds.	Srs.
Ganja	..	..	..	..	0	2
Charas	36	25	..	..	30	13
Bhang	20	0	..	..	19	4
Total	56	25	..	..	49	19

In 1912-13 and 1931-32 the consumption of each sort of hemp drugs was as below :—

	1912-13.		1931-32.	
	Mds.	Srs.	Mds.	Srs.
Ganja	0	15	0	3
Charas	22	17	33	3
Bhang	23	38	21	18
Total	46	30	54	24

111. *Restriction on hemp drugs traffic.*—Under the revised hemp drugs arrangements, license holders were to import the drugs by rail from other British Provinces in bond. Drugs so imported, were stored in a bonded warehouse established at Quetta and taxed on issue therefrom to licensed contractors for sale to the public. The rates of duty levied per seer on drugs so imported in each of the years 1912-13, 1931-32 and 1932-33 were as follows :—

	1912-13.	1931-32. and 1932-33.
	Rs.	Rs.
Ganja	7½	10
Charas	12	20
Bhang	1	1

The physical features of the frontiers of Baluchistan did not admit of strict control being imposed in respect of imports by illicit means from Afghanistan and Kalat, but these were subject to close supervision at the licensed vendors' shops where any stocks of drugs found in excess of the quantities taken by the vendors from the Bonded Warehouse at Quetta were assumed to have been imported from foreign territory and dealt with according to law.

112. *Illicit traffic and offences.*—*Charas* was occasionally smuggled from Persia, Malakand and Afghanistan, while a certain amount of *charas* and *bhang* was also illicitly imported from the Kalat State. Two cases of *charas* and one case of *bhang* smuggling as detailed below, were detected during the year under report :—

	Charas.	*Bhang.*
Quetta-Pishin	1	..
Sibi	1	1

The quantity of *charas* and *bhang* involved was 25 tolas and 20 seers respectively.

113. In order however to minimise the chances of smuggling *charas* from across the border, the selling price was fixed at Rs. 1-4-0 a tola with effect from the 1st April 1927. Prior to 1927-28 the selling rate not being fixed, the licensees sold *charas* at any rate they chose, and generally at the rate of Rs. 2-4-0 to 2-8-0 a tola. The price was reduced to 0-12-0 a tola from 1st October 1928. The result of the above measure was that the consumption of licit *charas* had gone up from 645 seers in 1927-28 to 1,055·20 seers in 1928-29, 1,287·73 seers in 1929-30, 1,306·58 seers in 1930-31, 1,323·32 seers in 1931-32 and 1,212·74 in 1932-33.

114. *Average consumption and taxation.*—The average consumption of hemp drugs (of various sorts together) per 1,000 of population in 1932-33 was 4·85 seers against 5·35 seers in 1931-32 and 4·5 seers in 1912-13. The average taxation thereon in 1932-33 amounted to Rs. 35·03 per seer (Rs. 19·78 from vend fees and the balance from duty), as compared with Rs. 27·02 per seer (Rs. 14·22 from vend fees and the balance from duty) in 1931-32 and Rs. 13·9 per seer (Rs. 8 from vend fees and the balance from duty) in 1912-13.

CHAPTER XVI.

I.

Classified statement showing consumption of hemp drugs of each sort separately, total consumption of all sorts taken together and the average consumption of hemp drugs (of all sorts taken together) per 1,000 of population during the years 1912-13, 1931-32 and 1932-33 (in seers).
